

## Payouts Challenge

- User sees how much money they have accumulated in their wallet (Total & Month over month)

- They hit Withdraw button
- User Enters withdrawal \$ amount

- **Integration with a service provider** - Save Bank details or Debit card details (Constraints: has to be global – using integrations like hyperWallet, StripeConnect or anything of preference)
- Payout gets transferred from his wallet to his bank account

Functionality

Design & Frontend Components

Transfer success – Demo
